

Adjustment to the market launch of the new SAF SBS1920H0 & SBS2224H0 trailer disc brakes

The launch of the new 19.5-inch trailer disc brake **SAF SBS1920H0**, originally scheduled for the third quarter of 2026, as well as the launch of the new 22.5-inch trailer disc brake **SAF SBS2224H0**, originally planned for the fourth quarter of 2026, has been postponed.

The reason for this is the additional validation and verification steps required as part of the final industrialization and approval phase.

Our goal is to deliver both products with the high quality you've come to expect from SAF-HOLLAND and to ensure that all technical, logistical, and documentation requirements are fully met before the start of mass production.

19,5"-Trailer disc brake SAF SBS1920H0

The postponement primarily affects the final synchronization of series approvals, the provision of the associated documentation, and the coordinated market launch of the new axle versions. Approvals that have already been granted and available product information remain valid unless otherwise communicated.

22,5"-Trailer disc brake SAF SBS2224H0

The introduction of both brakes is scheduled for a later date. We will inform you of the updated dates in a timely manner via a new 'Important Information' notice.
