

SAF Trailer Suspension Systems – Change Notification

New pin mechanism for galvanized mechanical sliding suspensions

Attention

In the interest of health and safety, SAF-Holland is revising the manufacturing process for all galvanized mechanical slide boxes to eliminate post-galvanized welding. Beginning September 1, 2025, all galvanized mechanical sliders will be equipped with the following:

- Zinc plated stud assemblies for hold down clips
- Galvanized torsion mechanism with zinc plated tube coupler and spring mechanism
- Zinc plated linkage arms with rue clips to secure to torsion mechanism

This change will not affect suspension performance, product warranty or installation as the slide box will be delivered fully assembled. Fit, form and function are not affected.

If you have any question or require additional product assistance, please contact your account manager or SAF-HOLLAND Customer Service at 1.800.876.3929
