

SAF® Air Disc Brake Wheel Ends

Product Discontinued – P89 Plus and P89 Integral

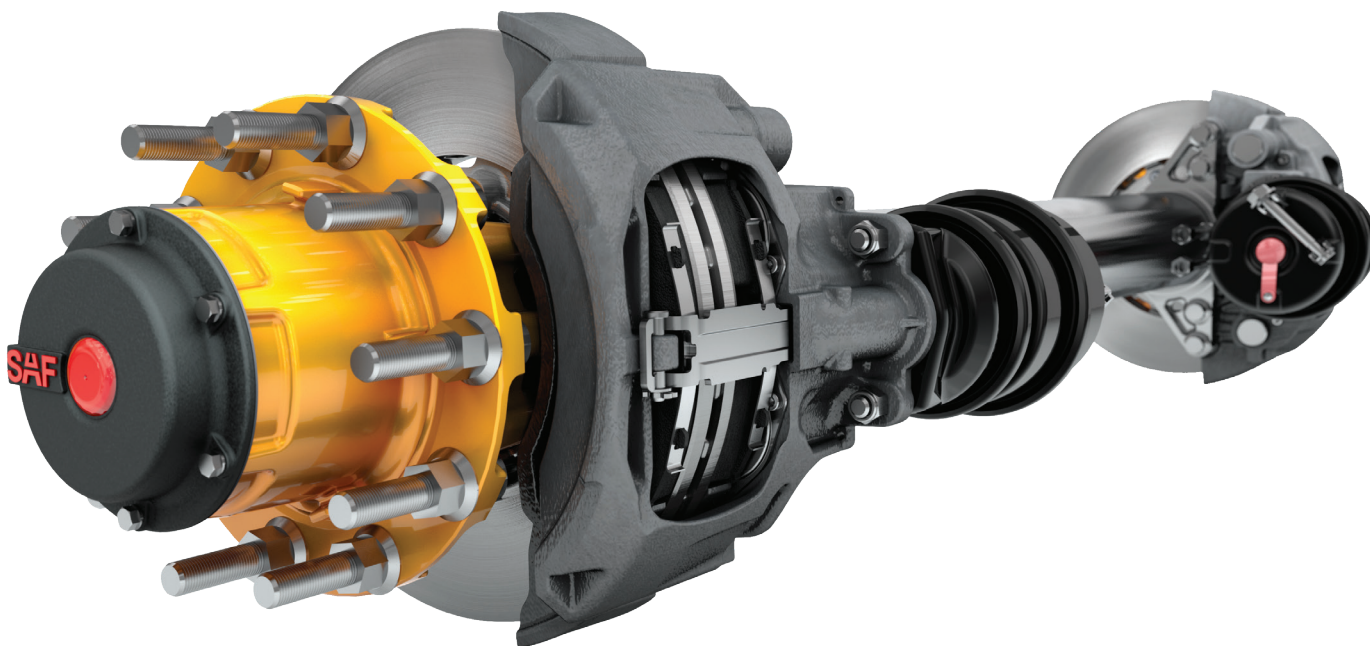

Effective Date: July 2026

Due to supply constraints, SAF-Holland will no longer offer P89 Plus and P89 Integral wheel end packages for new suspensions with disc brake axles. Beginning July 1, 2026, all disc brake axle specs will need to include an alternate wheel end package. Alternate wheel end packages include P89, P89 PSP7 and P89 PSP7 Lightweight. When the wheel end is properly converted, this change will not affect product warranty, fit, or function of the axle/suspension.

Service parts will be available for a limited time. After that, full wheel end replacement will be necessary. Note that the P89 Plus wheel ends use rotor mounted ABS tone rings, while all others use hub mounted ABS rings. Specific instructions on conversion will be supplied at a later date.

IMPACTED MODELS:

This discontinuation will affect all SAF trailer suspension models currently specified with P89 Plus or Integral wheel ends.
